

Application Serial No. 09/780,273
Supplemental Reply to Office Action dated September 7, 2005

REMARKS/ARGUMENTS

By this supplemental amendment/response, new claims 144-146 have been added to cover the embodiments wherein salt is employed as an additional additive. Clearly, the specification supports the addition of salt, see at least paragraph 0071 of the application as published, such that these changes do not introduce any new matter to the application. Following entry of this supplemental amendment/response, reconsideration of the application is respectfully requested.

Respectfully submitted,

Everett G. Diederiks, Jr.
Attorney for Applicant
